

12fl.

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant:

Vicente Javier Benedi

Serial No.:

10/009,980

Filed:

November 8, 200

For:

Molecular Methods for Detecting Guar

Gum Additions to Locust Bean Gum

Docket No:

8057/84086

Group Art Unit:

I hereby certify that this correspondence is being deposited with the United States Postal Service as first class mail addressed to Commissioner of Patents, Washington,

D.C. 20231 on this date:

February 8, 2002.

Reg. No. 41.217

INFORMATION DISCLOSURE STATEMENT

Commissioner for Patents Washington, D.C. 20231

Sir:

Pursuant to 37 C.F.R. §1.97, a list of documents A1-A6 is disclosed on the attached Form PTO-1449 that may be material to the examination of this application. Document A2 was published prior to the international filing date, but later than the priority date claimed. Should any fee be needed, please charge our Deposit Account No. 23-0920, and deem this paper to be the required petition.

Documents for which the supplied date of publication lists the year of publication without the month were published sufficiently earlier than the effective U.S. filing date and any foreign priority date, so that the particular month of publication is not in issue. Pursuant to §609 of the MPEP, it is understood that the month of publication is not required when the particular month of publication is not in issue.

No inferences should be drawn that the attached list represents a comprehensive investigation, or that any material disclosed is equivalent to the subject invention. In addition, none of the documents that have publication dates prior to the priority date of the above application anticipate the invention in this application.

The cited documents disclose numerous specific features. There has been no attempt to list each and every feature disclosed by each document. The Examiner is requested to review the

RECEIVED

documents and determine the extent of the materiality of the document disclosures with respect to the present invention.

The discussion of any art and the citation of any documents herein is not to be construed as an admission that the art or document disclosure is necessarily within the invention field of endeavor, that the art or document disclosure is necessarily prior in time to a particular date which may be relevant to the instant patent application, and/or that the art or document disclosure is otherwise necessarily prior art as defined by the patent law with respect to the instant invention and application.

Also, there is reserved the right to later set forth how the instant invention is distinguished over the disclosure of any document or other art, including the disclosures of the art and documents recited herein, that may be cited by the Examiner in rejecting a claim in the instant patent application. The recitation herein of the art and document(s) is not to be construed as an assertion that more pertinent art could not possibly be in existence.

Respectfully submitted,

Registration No. 41

Dated: February 8, 2002
